

Nesting tables are easy to move around and save space

I always suggest an extendable dining table for small-sized homes – especially when the dining and living areas are combined. It gives you more living space during the week, when the table is only used for the quick meals that are so typical of big city life. The table can then easily unfold to provide plenty of seating space for inviting friends over for dinner.

Small living rooms really benefit from nesting tables. Placed next to the sofa, they keep the center space of the living room clear. The small tables can then be easily moved around when table space is required, and they can be placed individually around the room as desired.

I like to use glass or shiny materials, as they help to reflect light around the room. The transparency of glass leaves an impression of endlessness and makes the room seem bigger.

Seats for sleeping

Most Japanese homes don't have spare rooms for overnight guests. Sofa beds are the perfect solution. Many people think that they have to compromise their love of design when buying a sofa bed. But our range of sofa beds combine aesthetics as well as function, so you can still achieve a great look, with ample seating that easily converts into a comfortable bed.

When it comes to space savers, I have to mention our Xtra ottoman. It is a great extra seat for the day – yet take the cover off and a folding bed is revealed! Xtra fits easily into any living room, functions perfectly as an ottoman or as an extra seat for guests and children, and you can choose exactly the cover you want to fit your style. Now that's what I call intelligent space management!

1: from \$599 Ottoman with sleeping function, available in different fabrics. Shown in, olive Pipe fabric, \$949. H16% \times W27%/82% \times D27%". [Xtra - 603031] **2: \$649** Nesting tables, 3 pcs, glass. H16% \times 15% \times 14% \times W16% \times 14% \times D16% \times 14% \times 12". [Occa - 2010] **3: \$449** Half table lamp, clear glass base with white shade. H26 \times W17% \times D5".
